

Meet your new termite protection.

As your pest management professional, we have elected to upgrade your termite bait system to a superior technology to protect your home from the damage that termites could cause.

Featuring the Advance[®] Termite Bait System

- **Proven Colony Elimination**

An insect growth regulator (diflubenzuron) proven to be an effective choice to protect your home in rigorous DNA studies at the University of Georgia and currently protecting over 400,000 homes in the U.S.

- **Dual Food Sources**

Larger recruitment of termites to the stations with minimal abandonment compared to older bait systems due to its unique two stage interior design with wood and Puri-Cell[®] monitoring tablets

- **Largest Containerized Bait**

No system offers a larger bait cartridge to destroy and eliminate your colonies faster than the Advance Termite Bait System

The Advance Termite Bait System is manufactured by Whitmire Micro-Gen Research Laboratories, Inc., one of the nation's leading suppliers of pest management delivery systems and insecticides. Whitmire Micro-Gen is a 74 year old company known for high quality, innovative products for professional pest control. For more information on the Advance Termite Bait System, visit www.advancetermitecontrol.com or call 800-777-8570.
