

High-performance microencapsulation technology for residual control. CyhaloCap CS provides broad-spectrum, residual control of structural pests for PMPs who prefer lambda-cyhalothrin.

CyhaloCap CS is a dilutable spray containing BASF's proprietary SmartCap™ microencapsulation technology and featuring lambda-cyhalothrin, a proven active ingredient with broad spectrum activity and effective residual control of structural pests.

CYHALOCAP CS BENEFITS

- Proven formulation – Features BASF's SmartCap Technology for proven performance on the toughest surfaces—porous and high-organic matter areas.
- Easy for technicians – Easy to mix dilution for effective applications packaged in our technician-friendly Tip-n-Measure bottle.
- Respected active ingredient – Contains lambda-cyhalothrin, which is preferred by some pest management professionals.
- BASF support – All our products come with our unparalleled support in the form of training, education and tools to help make your company more profitable.

SMARTCAP MICROENCAPSULATION TECHNOLOGY BENEFITS

- Extended residual control – SmartCap Technology significantly enhances the residual life of the active ingredient.
- Enhanced performance on porous and highly absorbent surfaces – Microencapsulation effectively stands up on concrete, mulch and other surfaces as the polymer shell protects the active ingredient making it more readily available to pests.
- Shortened contact time for pests – Insects can easily pick up the SmartCap microcapsules, leading to the fast diffusion of the active ingredient into the exoskeleton of the pest.
- Lower mammalian toxicity – Microencapsulation reduces applicator exposure due to decreased direct contact with active ingredient.

BASF Pest Control Solutions
The Evolution of Better Pest Control

BASF
The Chemical Company

DEVELOPED WITH YOU IN MIND

- Offers enhanced residual of advanced SmartCap Technology for PMPs who prefer lambda-cyhalothrin
- Effective formulation for ease of application

EFFECTIVELY CONTROLS OVER 50 PESTS INCLUDING

- Ants
- Centipedes
- Cockroaches
- Earwigs
- Flies
- Mosquitos
- Termites
- Wasps, Bees and Yellowjackets
- Spiders
- **Plus Many Others**

FOR USE IN AND AROUND A VARIETY OF LOCATIONS

- Home and Apartments
- Hotels and Motels
- Dairy Areas
- Pet Kennels
- Warehouses
- Supermarkets
- Food Storage Areas
- Commercial Food Handling

DESIGNED FOR PMPs WHO

- Prefer lambda-cyhalothrin
- Desire a broad label residual spray
- Seek the support and training of BASF

USE RATES (see label for directions)

- **Indoors:** 0.2-0.8 ounces/finished gallon
 - **Outdoors:** 2-8 ounces concentrate/50 finished gallons
- Consult label before using this product.

OTHER SMARTCAP SOLUTIONS

CY-KICK® CS

Our flagship microencapsulated multi-use spray featuring cyfluthrin with broad spectrum killing power for the most demanding pest control situations.

PERMACAP CS™

A microencapsulated, liquid permethrin that outperforms some older permethrin and bifenthrin formulations.

MICROCARE® 3% CS

The only microencapsulated botanical-based, general-use spray that extends the life of pyrethrum.

Always read and follow label directions. www.PestControl.basf.us
