

Alpine®

PT® Flea & Bed Bug Pressurized Insecticide

Rest Easy.

Your Go-to Solution For Fleas Now Goes After Bed Bugs, Too.

PT Alpine Flea & Bed Bug Pressurized Insecticide

is specially formulated to avoid soaking carpets while providing long-lasting protection from fleas. Plus it's pressurized for quick and efficient application. The IGR pyriproxyfen kills hatching eggs for up to seven months, while prallethrin provides fast knockdown of flea populations. And with the Reduced Risk* active ingredient dinotefuran, **PT Alpine Flea & Bed Bug Pressurized Insecticide** protects over the long term. Each 20-oz can covers a treatment area of 2,625 square feet, giving you exceptional value for your business and bottom line. Added to **Phantom® insecticide**, it's a simple one-two approach to the control of bed bugs, too.

**BASF**
We create chemistry

* Dinotefuran, the primary active ingredient in Alpine insecticides, has been granted Reduced Risk status for public health use by the EPA.

Alpine®

PT® Flea & Bed Bug Pressurized Insecticide

Convenient: Pressurized to help you efficiently and quickly control fleas for your customers.

Non-Soaking: Specially formulated to avoid soaking carpets while providing long-lasting protection from fleas.

Strong Residual Control: Kills hatching eggs for up to seven months, but also provides fast knockdown of adult fleas.

Exceptional Value: Each 20-oz. can controls fleas within a treatment area of 2,625 square feet, 31% more coverage than the competition*.

12 x 20 oz cans

* Precor 2000® covers 2000 square feet at label rate.

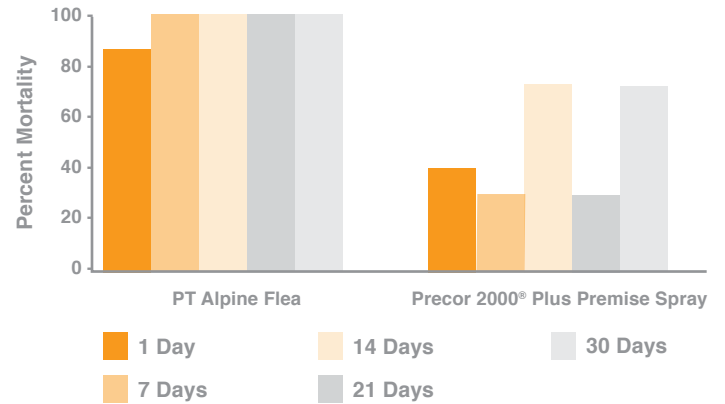

Mortality of Adult Cat Fleas on Carpet*

Source: Snell Scientifics, LLC, 2009. BASF sponsored research.

* Topical treatments (3 replications, n=10 fleas) Control: less than 6% knockdown.

Mortality of Adult Cat Fleas on Carpet Treated X Days Prior**

Source: Dr. Arthur Appel, Auburn University, AL 2009

** Mortality recorded after 1 day of exposure to residual treatment

PT Flea & Bed Bug Pressurized Insecticide Now Has Added Versatility: Bed Bug and Tick Control

- Kills bed bugs and ticks by contact for fast relief.
- Apply where bed bugs harbor or are suspected of traveling.
- Treat the perimeter of the room at the wall/floor junction, behind, under and/or inside furniture, upholstered furniture, headboards, wall coverings, and box springs. If suspected, apply to open carpeted area.
- Luggage: Direct product into pockets, seams, folds and around wheels of empty luggage.
- Treat the perimeter of the area or room where items are stored.

The fast action of **PT Alpine Flea & Bed Bug Pressurized Insecticide** is a perfect complement to the long residual action of **Phantom® insecticide** for a simple one-two approach for controlling bed bugs.
