## Termidor HE Copack: Registration Conditions

The summaries below provide a general overview of registration conditions. Please check with your state for current laws and regulations.

### Alabama:

Technical bulletin: For use on post-construction treatments using rod spacing in compliance with existing state regulations.

### Arizona:

Technical bulletin: For use on post-construction treatments only.

### Florida:

Technical bulletin: Treat using 0.06% and 0.125% finished solution and 1.0-1.5 gal/10 square feet for horizontal pre-construction treatments.

### North Carolina:

Technical bulletin: Rod spacing and depth, and trench depth and width must follow existing state regulations.

### Oklahoma:

Minimum Standards Must be Followed: Termidor HE must be applied according to State regulations regarding drill hole spacing for sub slab applications and rodding (12"), trench size (6" deep by 6" wide) and basements with a footer depth of 4 ft or more must be treated to a minimum of 4 feet of depth.

### South Carolina:

Technical bulletin: Rod spacing must follow existing state regulations.

### Tennessee:

Technical bulletin: It is not required that the applicator dig a 2 ft deep trench when footer is greater than 2 feet below grade.
