

Technical Bulletin

For Users in the State of South Carolina

TERMIDOR® H·E

HIGH-EFFICIENCY TERMITICIDE COPACK

with Termidor® HE Technology

This Technical Bulletin is specific to users of Termidor® H·E High-Efficiency Termiticide Copack with Termidor HE Technology (EPA Reg. No. 499-552-7969) in the State of South Carolina.

Per Section 27-1085, Standards for Prevention or Control of Wood destroying Organisms (Statutory Authority: 1976 Code Section 46-13-55) found within The Rules and Regulations for The Enforcement of The South Carolina Pesticide Control Act:

- *“Only pesticides properly labeled for subterranean termite control and registered for use in South Carolina shall be used.*
- *Where the Federal labeling accepted in the State requires more thorough treatment (e.g. closer spacing of drill holes or more volume of termiticide) than the treatment standards listed below the Federal labeling shall have precedence. Where the State standards require more thorough treatment the State standards must be followed.”*

As such, in the State of South Carolina:

- **For all Termite Treatments (Pre-construction; Post-construction Conventional Structural; Post-construction Exterior Perimeter/Localized Interior) using Termidor HE Copack:**
 - All rod/drill holes **must** be made at 12-inch intervals.
 - All injection points **must** be made at 12-inch intervals.
