

# Ridesco WG Insecticide

“After enduring more than three years of clover mite and springtail infestations in their newly constructed home, our homeowners were desperate for a solution. Moisture issues were addressed, and some level of control was achieved with long residual products; however, the problem persisted. With a single application of dual-mode Ridesco WG, we achieved nearly complete elimination of both clover mites and springtails. A subsequent application 60 days later prevented the recurrence of the ‘pest bloom’ that had plagued the family each year. Ridesco WG has restored their peace of mind, allowing them to enjoy their home again.”

**BRAD LAWLER, FOUNDER AND CEO  
TEAM BUG OUT PEST CONTROL, LOUISVILLE, KY.**

“We obtained some samples of Ridesco WG from our BASF rep, Corey Meudt, a couple of months before it was released on the market. We had several vacation rental home accounts on an island that were all managed by one property management company. All the homes were having issues with American cockroach infestations. We used Ridesco WG inside the homes during their normal preventive maintenance services and were very impressed with the results. Our technicians liked the ease of mixing with the pre-measured packets. They reported finding high numbers of deceased insects within the homes near the entryways in the days after application. I like that it combines two active ingredients and two modes of action, thus decreasing chances of pest resistance. We’ve now decided to utilize Ridesco WG on all our fall and winter rotation vacant properties services to help address any possibility of further issues.”

**JOSEPH LEA, VP  
DONNIE'S TOTAL PRIDE PEST CONTROL, PORT ST. JOE, FLA.**

“Ridesco WG has been an excellent addition to our product rotation. The combination of dinotefuran and cypermethrin provides my crew with a solid one-two punch like never before. It’s great to know we can confidently treat a wide variety of pests with it and know the situation is handled. Definitely a big thumbs-up from me.”
