Ridesco™ WG

Insecticide

Introducing the Rapid Response Heavy Hitter

Whether it's a cleanout, a first-time service or a treatment before your customer's next important event, you need a fast-acting and powerful solution that provides immediate results. Enter Ridesco WG Insecticide, a groundbreaking solution from BASF.

Quick Release Formulation

Quick release formulation allows active ingredients to hit pests immediately

Rapid Reduction of Pest Populations

Swiftly reduces pest populations, providing visible relief for your customers

Dual Active Power

Two proven active ingredients impact different physiological pathways, overpowering a broad range of pests

Flexible & Easy to Use

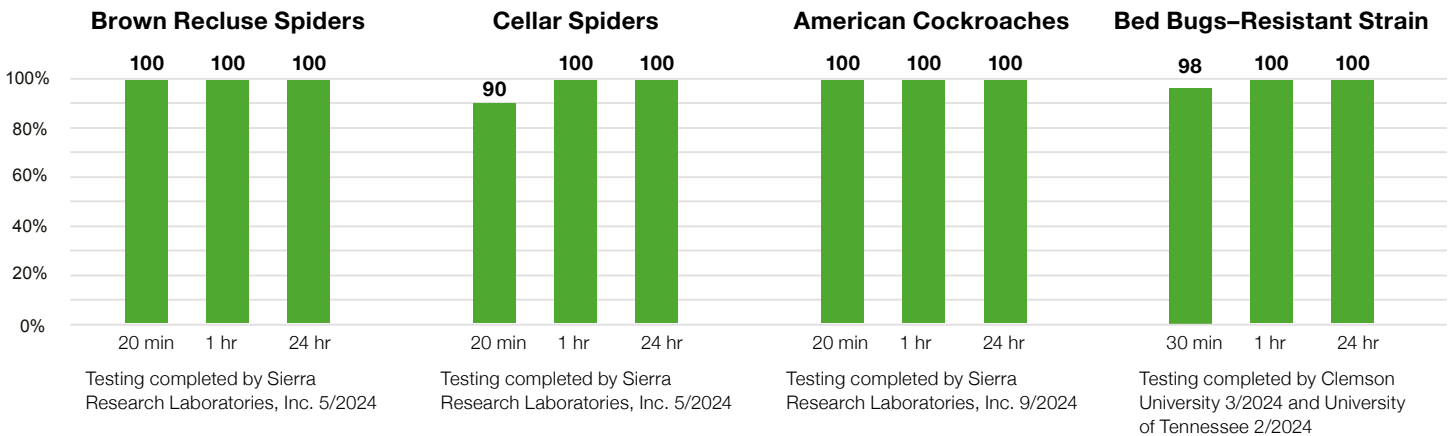

Dry formulation, flexible label, and one simple rate make it easy to use wherever you need it

Quick Release Formulation

Ridesco™ WG Insecticide features a quick-release formulation that allows the active ingredients to reach pests immediately, resulting in rapid impact across a wide variety of pests.

% Efficacy following Direct Application

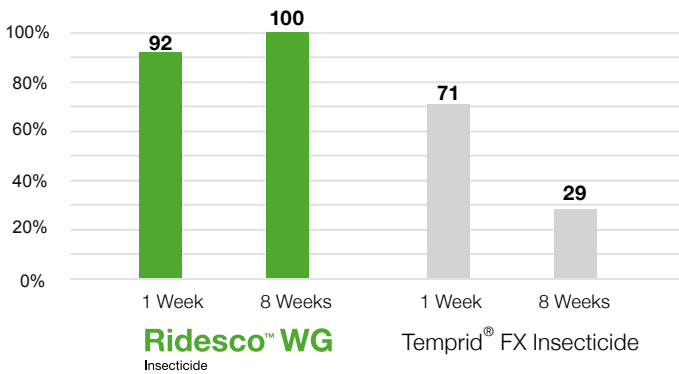

Rapid Reduction of Pest Populations

Ridesco WG Insecticide is designed to deliver a powerful upfront strike, rapidly reducing pest populations so they are less likely to repopulate.

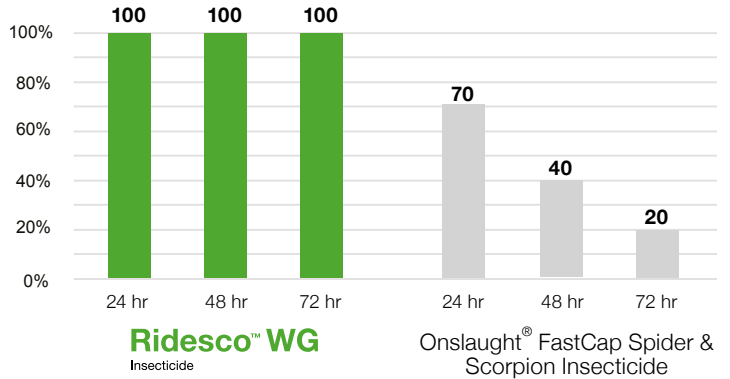

Earwigs

% Population Reduction After Treatments on/near Surfaces

Black Widow Spiders

% Knockdown & Mortality, 30 day Aged surface

Dual Active Power

Two Powerful Active Ingredients – Better Together

- Quickly reduces populations of a broad range of pests.
- Powered by two trusted active ingredients, Dinotefuran and alpha-Cypermethrin, that target the nervous system of the pest at two different sites.
- With two modes of action, it's a great fit for a resistance management program.

Flexible & Easy to Use

Convenient Dry Formulation

- Quickly disperses in water
- Easy to handle
- Easy to store and transport

Easy to mix and measure

- Measuring cup built right into the container cap

Flexible Label

- Over 50 labeled pests
- Indoor and outdoor, including food handling areas
- Residential, commercial, and industrial sites

One simple rate

- For all pests, 19 g/ gallon/ 1000 sq. ft.
- For treatments under mulch or coarse aggregate, use double the rate to a depth of 1 foot

Always read and follow label directions.

Before using Ridesco WG, confirm that it is registered in the state in which it will be used. Check any special state requirements for the use of neonicotinoids. Ridesco is a trademark of BASF. Onslaught is a registered trademark of MGK. Temprid is a registered trademark of Envu.
